Wesley J. Smith, pictured here with his wife, Sharlene, and their three children was diagnosed with Amyotrophic Lateral Sclerosis (ALS), more commonly known as Lou Gehrig's Disease. This fatal, neuro-muscular disease robs people of the ability to move, speak, swallow and eventually, breathe, while the mind remains fully aware. As of today, there is NO KNOWN CAUSE OR CURE. The financial burden of this disease can cost families up to \$200,000 per year, often depleting entire life savings, and the emotional burden is immeasurable.

Admission is Free -- A freewill love offering will be taken
